# | Environmental Policy

## 1. GENERAL

Last Mile designs, installs, owns and operates multi-utility infrastructure including gas, electricity, water, sewerage, meters, heat and cooling, connecting new build properties across Great Britain.

## 2. POLICY STATEMENT

It is Last Mile's Policy to manage the direct and indirect impacts on the environment of both the new utility installations, and our ongoing business operations. Last Mile recognises that its operations have the potential to impact biodiversity and has a responsibility to mitigate these impacts. In order to achieve this, we are committed to:

Delivering safely, on time, to budget and demonstrating a high standard of skill and care in everything that we do whilst ensuring always that due and appropriate consideration is given to the needs and concerns of our various stakeholders.

Maintaining and continually improving a documented and independently accredited Environmental Management System complying with the requirements of BS EN ISO 14001:2015.

Setting an example of leadership in environmental protection by promoting environmental awareness, preventing and seeking to understand and minimise the level of emissions in all areas of Last Mile's operations, effectively controlling the environmental risks to staff, contractors and the general public, so far as it is reasonably practical to do so.

Compliance with Environmental Legislation, approved Codes of Practice and industry recognised guidelines. Setting and reviewing at Board level, in conjunction with Last Mile's professional environmental protection advisers, environmental performance objectives and targets, incident investigations and audit programmes to facilitate continual improvement and enhance environmental performance.

Consider biodiversity within our decision-making process, both strategic and short term with the aim of a no net loss impact at our owned and operated sites. Where possible and appropriate Last Mile will seek to enhance the ability of our assets to provide habitats and support the local eco-system.

Ensuring hazardous waste is managed and disposed of in line with applicable legislation with the overall aim of minimising the resultant impact on the environment. We will ensure our employees are trained where their role may involve the handling of hazardous waste.

Consulting with staff and providing appropriate information, instruction and training to ensure all staff and contractors are aware of their environmental obligations. Seeking to minimise waste in all operations by promoting reuse, recycling and the use of recycled materials. Undertaking an ongoing programme of environmental protection awareness and ensuring that enough resource is allocated as required for the implementation of this Policy.

Communicating this Policy to staff, contractors, customers, the general public and other interested

parties.
